HEAT PRESS – HOT 1000e

All the advantages of a compressed air-driven heat press without having to be connected to an external compressor!

The Hot 1000e delivers the right pressure and the right temperature for your heat transfer application. The numerous built-in safety functions create a safe working environment for the user.

Push-buttons in the clear display make settings easy.

The extendable base plate makes work easier as the work surface is completely open for easy placement of garments and heat transfer. Simple hand grips make changing the base plate easy.
