

## HP-45NA - Manual T-shirt press

T-shirt press with a replaceable & rotatable subplate measuring 40x50 cm. Thanks to the design, T-shirts can easily be slid onto the work surface. The heated plate opens automatically when the preset time is up.

**Please note! This heat press is recommended only for use on T-shirts and thinner garments. For application on thicker materials, our specially developed heat presses are recommended.**

- Temperature: 0-230 °C
- Manual adjustment of pressure force
- Self-releasing after preset time
- Suitable for table placement
- Replaceable, rotatable lower plate
- Programmable timer
- Counter for press cycles (resettable).
- Protection against restart after power failure.
- Heating element cast in aluminum.
- Robust, solid structure.
- Replaceable protective Teflon sheet on the heating plate.
- 1 year warranty.
